0. **Будет ли в будущем возможность для человека перемещаться в пространстве быстрее, чем свет?**

Вопрос интересный, но с точки зрения физики, ответ отрицательный. Согласно специальной теории относительности, скорость света является предельной скоростью, которую может достичь любой объект с ненулевой массой покоя. Это связано с тем, что для достижения скорости света требуется бесконечное количество энергии. Поэтому, в рамках современной физики, перемещение быстрее света невозможно.
